

# Masterplans

UNLIMITED

Masterplans Unlimited offers a stunning and engaging interactive experience displaying every lot and home and land package for all your communities on one map, seamlessly integrated with your website.

## Live property data from Runway

There's no manual uploading to a third party mapping tool. When a property is sold, the masterplan updates in real time.

## Multi-community support on one map

Show all your properties across multiple communities on one single Google integrated map.

## Travel time filtering over multiple communities

Enter your work or childrens' school address with a preferred travel time and Masterplans Unlimited will filter the properties that are within your drive time limit.

## Community profiles

Integrate important details about your community, including news, events and images. You can output a snapshot of the live masterplan onto a beautifully designed PDF brochure.

## Designed to be responsive on all devices

From touch screens in your sales office, to PCs, tablets, and phones, Masterplans Unlimited offers ultra fast performance that automatically responds to any device.
